DETAILED ACTION

This action is in response to the RCE and IDS filed 10/11/2006.

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 10/11/2006 has been entered.

Allowable Subject Matter

Claims 1 and 3-22 are allowed for the reasons given in the Office action dated 7/19/2006.

Kim et al. (U.S. 5,278,438) discloses an invention similar to the one claimed by Applicant, but does not teach forming a first insulative material within a bottom portion of the trench to partially fill the trench such that the partially filled trench has a sidewall that is subsequently silicided. Rather, Kim et al. teaches siliciding all of the sidewalls and the bottom of the trench (Fig. 9), and then further etching the bottom of the trench (Fig. 10) and filling the trench with LTO or glass.

Chuang et al. (U.S. 6,159,789) teaches partially filling a trench with an insulative material and subsequently forming a silicide on the sidewalls of a trench, but the semiconductor material incorporated into the silicide is deposited into the trench after it

is etched, and is not the semiconductor material having an upper surface within which the trench is provided, as claimed by Applicant in claim 14.
